Target Groups and Permissions

124

Ontology as a background knowledge repository

Fig. 2: Ontology as a background knowledge repository.

129

Ontology fragment

Fig. 3: Ontology fragment.

136

Interactive visualization of the ontology

Fig. 4: Interactive visualization of the ontology. Information resources relative to the currently viewed object (here a module, upper left corner) are shown at the ends of the lines sorted after their type. Thus, a capital "A" in a square box represents a piece of audio, "MM" represents a multimedia resource, etc. The oval shapes represent a related subject in a more abstract sense, such as a person, a location, or an event.

141

Adaptive content presentation

Fig. 1: Example of adaptive content presentation based on user navigation behavior.

151

Personalization framework design modules
